PROFILE

I am a creative professional with over a decade of experience, starting as a Graphic Designer, where I mastered traditional printing and digital design processes. Over time, with a photography/cinema background, I expanded into video production and editing as well.

Today, as an Art & Creative Director, I lead campaigns from concept to execution, acting as a bridge between clients and the agency to bring ideas to life, as creative as possible.

My personal goal is to find balance on daily basis work with with creative, meaningful and memorable projects. As a professional, I aspire to thrive on the conceptual side of the market, as a creative and brand expert.
